# MITSUBISHI CP-2000UA

## Analog Dye Sublimation Color Printer For High Resolution Letter Size Output.

The CP-2000UA features Mitsubishi's advanced dye sublimation thermal printing technology with extremely high reliability and repeatability along with the highest possible speed, resolution and color accuracy on letter size output. The CP-2000UA is ideally suited for image critical applications such as nuclear medicine.

The CP-2000UA produces up to 256 shades of gray or 16.7 million possible colors per pixel using a 325 dpi printhead. It delivers output in as little as 85 seconds (S size paper) with a maximum resolution of up to 2560 x 2970 (maximum RAM). Auto-scanning RGB allows the printer to work with PC or Macintosh® computers and UNIX® workstations without software drivers. The CP-2000UA prints on two paper sizes (8.5 x 7.9" and 8.5 x 11") or 4-panel media (8.5 x 11") with self-laminating finish for extended print life.

# CP-2000UA DYE SUBLIMATION PRINTER
