

UP-980

Black & White Dual Scan Video Graphic Printer

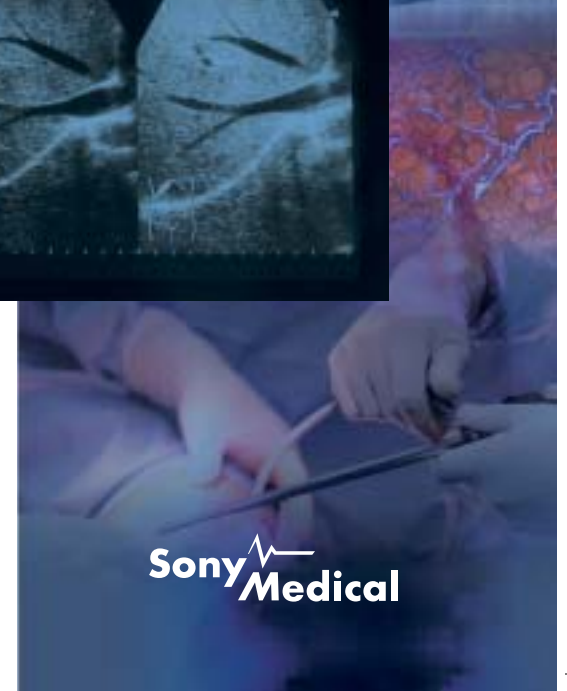

The UP-980 is a full page black and white dual scan video graphic printer that produces high quality hard copy images in 10 seconds. The Dual Scan feature allows the printer to sync up to any 15.75kHz or 31.5kHz composite signal. The UP-980's optional blue transparency media produces high quality film-like transparencies. These and other printer features make the UP-980 ideal for medical black and white applications such as ultrasound, mobile c-arm, and cardiac cath lab.

UP-980

- Optional UPT 210BL Blue Transparency media for high quality cost effective film type prints
- Dual Scan feature allows printer to sync up to 15.75kHz or 31.5 kHz composite signal
- Excellent print quality and contrast due to true 256 gray scale gradations
- Fast 10 second print speed
- Front panel LCD display allows easy adjustment of printer without monitor
- Multiple pictures on one sheet capability (one, two, four, six)
- UL2601-1 listed for integration into medical environments
- Worldwide power and video capability
